PROFILE

A motivated ICT and cybersecurity professional with a background in Mathematics and Computer Science from Jomo Kenyatta University of Agriculture and Technology, and a strong interest in networking, system support, and digital security. Possesses hands-on experience in ICT support, systems troubleshooting, networking, cybersecurity, and user technical support gained through industrial attachment, cybersecurity training, lab environments, and personal technical projects. Skilled in Windows and Linux environments, LAN troubleshooting, hardware and software support, network diagnostics, documentation, and cybersecurity operations. Through continuous learning platforms such as TryHackMe and Hack The Box, has strengthened my practical understanding of Active Directory, system hardening, vulnerability assessment, incident response, and enterprise IT environments. Passionate about maintaining reliable and secure ICT systems, supporting users effectively, and continuously expanding technical expertise in modern IT infrastructure and security operations.

EDUCATION

Jomo Kenyatta University of Agriculture and Technology

Sept 2021 - Dec 2026 (Awaiting)

*Bachelor of Science Mathematics and computer
Science*

Certifications

Cyber shujaa

Apr 2026

Security Analyst

Kenya Cyber Security & Forensics Association (KCSFA)

Jan 2025

Membership Certificate

SKILLS

Technical skills

- ICT Support & Administration – Hardware/software troubleshooting, system installation & configuration, endpoint support, user account support, technical documentation, preventive maintenance
- Operating Systems – Windows 10/11, Windows Server basics, Linux (Ubuntu, Kali)
- Networking – TCP/IP, OSI model, DNS, subnetting, VLANs, IP addressing, LAN troubleshooting, routing & switching fundamentals, Cisco Packet Tracer, Wireshark, Nmap
- Microsoft Technologies – Microsoft Office Suite, PowerPoint presentations, Teams, OneDrive, SharePoint basics, Active Directory fundamentals, Microsoft 365 familiarity
- Cybersecurity – Vulnerability assessment, system hardening, SOC fundamentals, incident response, Windows forensics, OSINT, OWASP Top 10, web security testing, Splunk monitoring
- Virtualization & Labs – VirtualBox, VMware, virtual lab setup and maintenance
- Cloud Computing – AWS/Azure fundamentals, cloud deployment models, basic cloud security concepts
- Programming & Scripting – Python, C++, R, Java, JavaScript (basic)
- Tools & Platforms – Wireshark, Burp Suite, Splunk, Nmap, Git/GitHub, VS Code, Jupyter Notebooks, MATLAB, TryHackMe, Hack The Box

Soft Skills

Demonstrates strong analytical thinking and problem-solving abilities, with proven capacity to work effectively in team environments while contributing leadership and collaboration skills. Possesses excellent adaptability, fast learning capabilities, and effective time management in dynamic technical environments. Skilled in communication, technical writing, and documentation, with a strong research mindset and keen attention to detail. Committed to continuous self-learning, professional ethics, and maintaining high standards of security awareness in ICT and cybersecurity operations.

EXPERIENCE

KALRO (Kenya Agriculture and Livestock Research Organization)

Jun 2024-Aug 2024

- Provided technical support for hardware, software, and network issues within Windows and Linux environments
- Performed LAN troubleshooting, including IP conflicts, connectivity issues, and network performance optimization
- Installed and configured operating systems, applications, antivirus software, and endpoint devices
- Assisted in router, switch, and wireless access point configuration and troubleshooting
- Supported hardware maintenance and upgrades, including RAM, storage, and network components
- Assisted users with system troubleshooting and technical guidance for daily ICT operations
- Participated in the documentation and reporting of ICT-related support activities

Projects

▪ Cybersecurity Home Lab – (July 2026 – Present, Ongoing)

Designing and implementing a cybersecurity home lab using Windows and Linux systems to simulate enterprise environments. Focus includes system hardening, access control, endpoint security, attack simulations, malware testing, incident response, log analysis, and system recovery. Tools to be used: Windows, Linux (Ubuntu/Kali), VirtualBox, VMware, Wireshark, Splunk, Nmap.

▪ Networking Lab (Cisco Packet Tracer) – (July 2026 – Present, Ongoing)

Designing and simulating multi-segment network environments using Cisco Packet Tracer, including routing, switching, VLANs, IP addressing, network troubleshooting, connectivity diagnostics, and topology documentation. Tools to be used: Cisco Packet Tracer, Wireshark (basic analysis), Windows/Linux.

▪ Maternal Nutrition & Child Health Data Analysis (Kenya DHS Dataset) – (2024, Completed)

Led analysis of over 10,000 records using R, including data cleaning, preprocessing, exploratory data analysis, statistical modeling (logistic regression, random forest), hypothesis testing, and visualization to generate insights and policy-relevant recommendations. Tools used: R (tidyverse, ggplot2, caret), RStudio.

REFEREES

Gloria Amati Onyando
Head of the ICT department,
KALRO HRI, Kandara,
P.O. Box 220-01000,
Thika, Kenya,
